

AIR CLEANING BLOWERS™

SELF CLEANING- NO FILTER ELEMENTS TO MAINTAIN

ACB MODEL T5

AIR FLOW: 400-500 CFM

UNIT TECHNICAL SPECIFICATIONS

Standard Electrical Options:

(other Configurations Available Upon Request)

115 Volts / 60 Hz / 1Phase

208-230 Volts / 60 Hz* / 1 Phase

460 Volts / 60 Hz / 3 Phase & 380-420 Volts / 50 Hz / 3 Phase

*All units lose capacity when operating on 50 Hz as compared to 60 Hz

Amperage of Components:

(60 Hz Data)

• 115/1/60 - FLA = 14.0A, MCA = 18.0, MOP = 30.0A

• 208-230/1/60 - FLA = 8.6A, MCA = 11.0A, MOP = 15.0A

• 208-230/3/60 - FLA = 7.5A, MCA = 10.0A, MOP = 15.0A

• 460/3/60 - FLA - 4.6A, MCA = 6.0A, MOP = 15.0A

Most units can run on 50Hz current, without adaptation, but with reduced capacity and RPM. Additional models available to operate on special voltages.

Standard models are 18 gauge steel cabinets and a 12 gauge mounting plate.

Metal material options: Aluminum, 304 Stainless Steel or 316 Stainless Steel.

Rain hoods and downspouts are removable to facilitate installation, but necessary for safe functioning of the standard units, unless they are installed in duct work.

Units meet IP54 or higher standard. They can meet NEMA 4X standard if made of type 304 or type 316 stainless steel and appropriate material for impeller.

APPLICATIONS

Manufacturing	Medical	Data Center / Clean Rooms	Mining / Oil / Tunneling	Office / Corporate
Food Processing	Military / Government	Agriculture	Transportation	School / Institution

AIRFLOW PERFORMANCE

* All values labeled in the graph and table are estimates.

Point	Power Supply V	Frequency Hz	Speed RPM	Airflow CFM	Pressure IN H2O.
1	460	60	1729	632	0.0
2	460	60	1731	522	0.5
3	460	60	1733	426	0.9
4	460	60	1740	224	1.7
5	460	60	1753	0	2.8

OPTIONS

- | | |
|---|--|
| Heating Elements | 1.5 to 20 kW of electrical-resistance heat using corrosion-resistant tubular incoloy elements (not light-weight wires). |
| Collecting Particles | In the case that the material being removed from the air or other gas has value, various adaptations can channel the material to a collection point. For some models, ACB can offer optional, reusable particle-collection bags. |
| Housing for Downstream Specialty Filter Media | Activated carbon and other chemical-removing bulk media or filter elements to remove finer particles than the ACB removes. |
| Thermostat | To control the airflow or to warn user of high or low temperatures. |
| Adaptation for Installation On/In Vertical and other Air Conditioners | Provide changes of air and/or pressurization and purging to enclosures served by the Air Cleaning Blowers™. |
| Hazardous-Area Controls | To provide NFPA Type X, Y, or Z purging and pressurization. |
| Adaptation for Hazardous (Explosive) Ambients | NEC Class I Groups A, B, C, or D, Class II Groups F or G, or Class III Division/Zone 2 or Class I Groups C or D, Class II Groups E, F, or G, or Class III, Division/Zone 1 or 2 and their ATEX and IECEx equivalents. |

INSTALLATION

The units normally bolt to the wall. They require no additional support, unless the wall cannot support the weight indefinitely. When these ACBs are installed on a wall, the passage through the wall can be lined with a duct, if desired. Most units come with a cord for connection to a junction box.

The ACBs can also be installed through the wall

DIMENSIONS

All dimensions are inches (IN), followed by centimeters (CM).

Weight of unit: 125lbs (56.7 kg)

AIR CLEANING BLOWERS™

SELF CLEANING- NO FILTER ELEMENTS TO MAINTAIN

Build Your Own Model (Number):

In order to properly specify your ACB, you must make selections in each of the categories: electrical, heat, cabinet material, impeller material, exterior finish, and hazardous location. The only category that is completely optional is "additional options" and it can be omitted if you do not have any special needs.

The electrical codes available for your ACB specification are: A, B, C, E, F, G, H and X. Select your electrical configuration using one of the codes listed below (). Next select a code for your desired heat option ().

The unit is made up 18 gauge material, with the choice of code(s): A, 4, 6, T () and with your choice of finish (). The impeller material is (). Note the impeller material most common for this model is code(s): A.

Next select the desired hazardous (explosive) - location rating if applicable (). This will complete the mandatory fields necessary to order or specify your Air Cleaning Blower™.

You can browse through the additional options / special conditions / custom modifications and select and add a code based on your additional needs, if any.

Choose your model by filling out the blanks with the appropriate code from the list below!
