

Air Cleaning Blowers, LLC

P.O. BOX 803

Selkirk, New York 12158 U.S.A.

Telephone: (518) 635-4169 Marketing@AirCleaningBlowers.com

Ratio of Feed Air Entering Compressor Versus High-Pressure Air Out of Compressor

Times more dense at higher gauge pressures than at 0 psi gauge pressure at different temperatures [°F] => The multiplier of the CFM of air out of compressor at given pressure versus the CFM of feed air at local atmospheric pressure

Gauge pressure [psi]	Entering Air Temperature:	30	40	50	60	70	80	90	100	120	140	150	200	250	300	400	500	600
